## *Recent Addition (March-April)*

The author of the #1 New York Times bestseller Think like a Monk offers a revelatory guide to every stage of romance, drawing on ancient wisdom and new science. Nobody sits us down and teaches us how to love. So we're often thrown into the world of relationships with nothing but romance movies and pop culture to help us muddle through. Until now.

Instead of presenting love as an ethereal concept or a collection of cliches, Jay Shetty lays out specific, actionable steps to help you develop the skills to practice and nurture love. He shares insightful rules such as win or lose together, how to define love, and you don't break in a break up. Inspired by Vedic wisdom and modern science he tackles the entire relationship cycle, from first dates to moving in together to breaking up and starting over. And he shows us how to avoid falling for false promises and unfulfilling partners.

By living Jay Shetty's eight rules, we can all love ourselves, our partner, and the world better than we ever thought possible.
