KUANTAN: The construction of additional buildings and facilities at the Pahang Malaysia Sports School (SSMP) is set to provide a more conducive environment for learning and training for athletes, teachers, and staff.

Education Minister Fadhlina Sidek, in a Facebook post today, said the project included new dormitories, covered pavilions, open multipurpose halls, staff quarters, synthetic hockey pitches, training fields, and various other facilities to meet the school's growing needs.

"SSMP must continue to strive for excellence and produce more sports champions who will make the nation proud on the international stage," she said.

"SSMP has already demonstrated its strength in rugby. I have closely followed the progress of the 'Falcons' team, which won the prestigious Super Schools Rugby 2025 tournament at national level and most recently emerged champions at the 2026 Asian Under-19 Sevens Rugby Championship," she added.

Fadhlina expressed hope that SSMP would maintain its momentum and continue to contribute significantly to the development of national sports.

"Through schools, district education offices and state education departments, the ministry is ready to provide guidance so that parents can make the best decision for their children," he said.

Online registration for Year One of the 2027 academic session remains open until March 31 via the ministry's integrated system through the Identity Management System (idMe) portal at https://idme.moe.gov.my.
